

ZR
zero radius

The McNeilus® Zero Radius™ Automated Side Loader has a true zero-radius motion, eliminating arm kick-out. The simple arm reduces total cost of ownership by lowering maintenance costs and increasing efficiency and driver productivity.

*THE TIGHTER THE SPACE,
THE MORE YOU'LL APPRECIATE
OUR ZERO RADIUS ASL.*

You've got a lot to deal with on your collection routes: narrow streets and alleyways; clearance issues around containers; and productivity-robbing equipment maintenance when you're back in the garage.

You can trash these hassles with the McNeilus® Zero Radius™ Automated Side Loader.

The Zero Radius Automated Side Loader offers an advanced, yet simple, zero radius operation. Its field-proven arm, and simple and reliable electronic controls, enable you to handle up to 1500 containers daily, no matter how close they are to fences, walls, or other structures.

The side-mounted arm allows for better overall weight distribution and improved packaging, while reducing stress on the vehicle chassis. It's easily maintained and backed by the strongest nationwide service and support network in the industry.

Available in 22, 24, 26, 27, 28 and 31 cubic-yard body sizes.

Handles up to 1,500 containers a day.

Full-eject body keeps the driver in the cab at the transfer station or landfill, enhancing safety, reducing chassis wear and simplifying operations.

The McNeilus NGEN™ Compressed Natural Gas (CNG) system is available on a wide range of chassis and with multiple engine options. The CNG systems are installed right at the McNeilus factory with no impact to your body lead time.

McNeilus

The Excalibre™ cylinders feature a hardened tool steel scraper that prevents seal damage and prolongs cylinder life and hydraulic system integrity.

Low profile body design allows for easy CNG system installation.

Automatic packing, with automatic return to prevent follower damage.

Electronic joystick with ergonomic controls.

The ergonomic Command Zone® cab controls and multiplexed system are integrated into the dash with control surfaces that are backlit, laser etched, and operator friendly with easy to understand symbols. This eliminates the need for stuffing relays, large bundles of wiring harnesses, and switches under the dash.

Large 4.8 cubic-yard hopper, perfect for high-density routes.

Master display module features full color capability, larger screen, easy-to-read text, and easy-to-navigate controls.

ZR/28
zero radius
The Power of Zero

Optional 12-foot extended reach arm for cul-de-sacs or areas with on-street parking.

Arm can handle 30-, 60-, 96-, and 110-gallon carts. Smooth arm operation improves driver comfort and dramatically reduces body sway and noise.

Arm operates at idle speed. Combine this with McNeilus' load-sensing hydraulics — which ensures pumps and motors only work when they need to — and you can save on fuel costs while potentially increasing oil life and reducing noise in residential areas.

ZERO RADIUS. 110% SUPPORT.

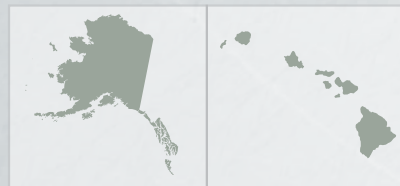

We listen to our customers before, during, and after the sale. Contact our dedicated network of branch offices and service centers that are strategically located throughout North America. We offer same day parts shipments, 24/7 response, a stock truck program, leasing and financing options. And we are standing by to answer questions at 888-686-7278.
